TRENDS IN BIOCHEMICAL SCIENCES

REFERENCE EDITION

Volume 14

1989

CONTENTS

JANUARY

Journal Club *page*

Does glutamine regulate skeletal muscle protein turnover? *by Malcolm Watford* 1

Trans-bilayer lipid interactions, *by John L. Harwood* 2

Features

Emerging Techniques: Rapid detection and characterization of multimolecular cellular constituents by two-dimensional agarose gel electrophoresis, *by Philip Serwer, Richard A. Easom, Shirley J. Hayes and Merle S. Olson* 4

Discussion Forum: Citation analysis and the science policy arena, *by M. H. MacRoberts and B. R. MacRoberts* 8

Citations and the evaluation of individual scientists, *by Stephen Cole* 9

Letters

A surprising omission, *by Jeremy Lakey, Franc Pattus* 14

(*Reply from Saimi* et al.) 14

A sequence editor for microcomputer users, *by Eric Cabot* 14

Response to Price's protein puzzle, *by Adolfo Jiménez* 14

Reviews

'Snurpogenesis': The transcription and assembly of U snRNP components, *by Huw D. Parry, Daniel Scherly and Iain W. Mattaj* 15

The AMP-activated protein kinase: a multisubstrate regulator of lipid metabolism, *by D. Grahame Hardie, David Carling and Alastair T. R. Slim* 20

The use of substrate analogues to study the active-site structure and mechanism of PEP carboxylase, *by Daniel H. González and Carlos S. Andreo* 24

Signal transduction via phosphatidylcholine cycles, *by Steven L. Pelech and Dennis E. Vance* 28

Leading organellar proteins along new pathways: the relocation of mitochondrial and chloroplast genes to the nucleus, *by Phillip Nagley and Rodney J. Devenish* 31

Book Reviews

The Microbes (by Paul J. VanDemark and Barry L. Batzing), *by W. A. Hamilton* 36

Protein Transfer and Organelle Biogenesis (edited by R.C. Das and P. W. Robbins), *by G. A. Reid* 36

Iron Transport in Microbes, Plants and Animals (edited by G. Winkelmann, D. Van der Helm and J. B. Neilands), *by Robert R. Chrichton* 37

Concise Encyclopedia: Biochemistry (by Thomas Scott and Mary Eagleson), *by Robin Hesketh* 38

Books in Brief

A Practical Guide to Molecular Cloning (by Bernard Perbal) 39

ELISA and Other Solid Phase Immunoassays (edited by D. M. Kemeny and S.J. Challacombe) 39

Books Received 39

FEBRUARY

Journal Club *page*

Cloning of a rat D_2-dopamine receptor, *by Alfred Maelicke* 41

Myoglobin and haemoglobin: role of distal residues in reactions with haem ligands, *by M. F. Perutz* 42

Features

Subcellular fractionation of tissue culture cells, *by Kathryn E. Howell, Eileen Devaney and Jean Gruenberg* 44

Talking Point: Two lipocortin-like proteins, endonexin II and anchorin CII, may be alternate splices of the same gene, *by Harry T. Haigler, James M. Fitch, Jay M. Jones and David D. Schlaepfer* 48

Obituary: Ole Maaløe (1915–1988), *by Niels Ole Kjeldgaard* 51

Reviews

Vertebrate homeodomain proteins: families of region-specific transcription factors, *by C. V. E. Wright, K. W. Y. Cho, G. Oliver and E. M. De Robertis* 52

Two pumps, one principle: light-driven ion transport in Halobacteria, *by Dieter Oesterhelt and Jörg Tittor* 57

Multifunctional Ca^{2+}/calmodulin-dependent protein kinase: domain structure and regulation, *by Howard Schulman and Lillian L. Lou* 62

The cyclic AMP-mediated stimulation of cell proliferation, *by Jacques E. Dumont, Jean-Claude Jauniaux and Pierre P. Roger* 67
Photosynthetic antenna proteins: 100 ps before photochemistry starts, *by C. Neil Hunter, Rienk van Grondelle and John D. Olsen* 72
Bacterial resistance ATPases: primary pumps for exporting toxic cations and anions, *by Simon Silver, Giuseppina Nucifora, Lien Chu and Tapan K. Misra* 76

Book Reviews
Macromolecular Sequencing and Synthesis: Selected Methods and Applications (edited by David H. Schlesinger), *by Rob Richards* 81
Cytoskeleton (by A. D. Bershadsky and J.M. Vasiliev), *by Eric Karsenti* 81

Books in Brief
Modern Physical Methods in Biochemistry (edited by A. Neuberger and L. L. M. van Deenen) 83
Small Nuclear Ribonucleoprotein Particles (edited by Max L. Birnstiel) 83

Books Received 83

MARCH

page

Journal Club
The complexities of the cell cycle, *by Carol Featherstone* 85
A role for membrane-inserted protein kinase C in cellular memory? *by Robert D. Burgoyne* 87

Features
Talking Points: Deciphering the language of cells, *by Tian Yow Tsong* 89
A reappraisal of the binding of cytosolic enzymes to erythrocyte membranes, *by D. Maretzki, B. Reimann and S. M. Rapoport* 93

Letters
Is 'hydrophobicity analysis' sufficient to predict topography of membrane proteins? *by T. Ferenci* 96

Reviews
Phosphorothioates in molecular biology, *by F. Eckstein and G. Gish* 97
From analysis to synthesis: new ligand binding sites on the lactate dehydrogenase framework. Part I, *by A. R. Clarke, T. Atkinson and J. J. Holbrook* 101
How RNA polymerase II terminates transcription in higher eukaryotes, *by N. J. Proudfoot* 105
Enterokinase (enteropeptidase): comparative aspects, *by A. Light and H. Janska* 110
The Evolution of H^+-ATPases, *by N. Nelson and L. Taiz* 113

Reflections on Biochemistry
The origins of growth factors: tethelin lost, *by A. W. Burgess* 117

Book Reviews
Calmodulin (edited by P. Cohen and C.B. Klee), *by D. M. Watterson* 121
Plant Molecular Biology: 2nd Edn (by D. Grierson and S. N. Covey), *by A. C. Cuming* 122
Heterochromatin: Molecular and Structural Aspects (edited by Ram S. Verman), *by D. A. Jackson* 123

Grapevine 124

A poem
To transform or not to transform, *by J. L. Cutts* 92

APRIL

page

Journal Club
The versatility of lipases for industrial uses, *by John Harwood* 125

Features
Open Question: Do Hoogsteen base pairs occur in DNA?, *by José Portugal* 127
A common theme in the amino acid sequences of actin and many actin-binding proteins? *by Ross L. Tellam, Donald J. Morton and Francis M. Clarke* 130
Obituary: Henry Kamin (1920–1988): a renaissance man, *by Bettie Sue Masters* 134

Letter
New hope for reverse genetics, *by Harold B. White, III and Jacques J. Pène* 135

Lipsky Acrostic 136

Reviews
Helix-turn-helix, zinc-finger and leucine-zipper motifs for eukaryotic transcriptional regulatory proteins, *by Kevin Struhl* 137
Enzymatic catalysis in anhydrous organic solvents, *by Alexander M. Klibanov* 141
From analysis to synthesis: new ligand binding sites on the lactate dehydrogenase framework. Part II, *by Anthony R. Clarke, Tony Atkinson and J. John Holbrook* 145
Green enzymes and suicide substrates: a look at the acyl-CoA dehydrogenases in fatty acid oxidation, *by Colin Thorpe* 148
Electrode surface microstructures in studies of biological electron transfer, *by G. Duncan Hitchens* 152

Book Reviews
Molecular Immunology (edited by B. D. Hames and D. M. Glover), *by Neil Barclay* 155
Ubiquitin (edited by Martin Rechsteiner), *by J. Fred Dice* 155
Bacterial Energy Transduction (edited by Christopher Anthony), *by P. Leslie Dutton* 156
Membrane Bioenergetics (by Vladimir P. Skulachev), *by Matti Saraste* 157

Books in Brief
Regulation of Enzyme Activity (by J. H. Ottaway) 158
Gas and Liquid Chromatography in Analytical Chemistry (by Roger M. Smith) 158

MAY

Journal Club *page*
Structure and regulation of ribulose-1,5-bisphosphate carboxylase/oxygenase, *by David B. Knaff* 159

Features
Open Question: Does muscle activation occur by direct mechanical coupling of transverse tubules to sarcoplasmic reticulum?, *by Anthony H. Caswell and Neil R. Brandt* 161
Talking Point: How 'hidden' reading frames are expressed, *by Roberto Cattaneo* 165
Emerging Technique: Characterization of oligosaccharides by lectin affinity high-performance liquid chromatography, *by Eric D. Green and Jacques U. Baenziger* 168

Reviews
The oncogene *jun* and nuclear signalling, *by Peter K. Vogt and Timothy J. Bos* 172
Expression of ribosomal protein genes and regulation of ribosome biosynthesis in *Xenopus* development, *by Francesco Amaldi, Irene Bozzoni, Elena Beccari and Paolo Pierandrei-Amaldi* 175
Bacterial ice-nucleation proteins, *by Paul Wolber and Gareth Warren* 179
Nitrogenases without molybdenum, *by Richard N. Pau* 183
Involvement of ion channels and active transport in osmoregulation and signaling of higher plant cells, *by Julian I. Schroeder and Rainer Hedrich* 187

Reflections on Biochemistry
One man's view of cell biology in Cambridge in the 1930s, *by E. N. Willmer* 193

Book Reviews
Plant Pigments (edited by T. W. Goodwin), *by C. Gamini Kannangara* 196
Oncogenes: An Introduction to the Concept of Cancer Genes (edited by K. B. Burcle, E. T. Liu and J. W. Larrick), *by Alan Hall* 196
Receptor Biochemistry and Methodology, Vol. 12: Insulin Receptors, Part A: Methods for the Study of Structure and Function; and Part B: Clinical Assessment, Biological Responses and Comparison to the IGF-1 Receptor (edited by C. R. Kahn and L. C. Harrison), *by Kenneth Siddle* 197

Books in Brief
Molecular Basis of Inherited Disease (by K. E. Davies and A. P. Read) 198
Genome Analysis: a Practical Approach (edited by K. E. Davies) 199

Books Received 199

JUNE

Journal Club *page*
Membrane-anchored growth factors work!, *by Robert E. Steele* 201
Tetrahymena telomerase contains an internal RNA template, *by Angus I. Lamond* 202
Plant tricothecenes, *by Roger C. Prince* 204

Features
Standards for the PhD Degree in Biochemistry and Molecular Biology, *by F. Vella* 205
Biochemistry in Italy, *by Sergio Papa and Vincenzo Bocchini* 209

Letters
Low-frequency resonance and cooperativity of hemoglobin, *by Kuo-Chen Chou* 212
(Reply from Enrico di Cera and Stanley J. Gill) 213
Peer review and publishing, *by John Maddox* 213
(Reply from Ralph A. Bradshaw) 213

Reviews
The human T-cell receptor γ (TRG) genes, *by Marie-Paule Lefranc and T. H. Rabbitts* 214
Alternatives for the initiation of translation, *by Ronald C. Herman* 219
The structure of a primitive kinetochore, *by Kerry Bloom, Alison Hill, Margaret Kenna and Michael Saunders* 223
Photosystem II, the water-splitting enzyme, *by A. W. Rutherford* 227
Molecular dissection of a transfer RNA and the basis for its identity, *by Ya-Ming Hou, Christopher Francklyn and Paul Schimmel* 233

Reflections on Biochemistry
The early history of sialic acids, *by Hans Faillard* 237

Book Reviews
The Respiratory Burst Oxidase and its Physiological Significance (edited by Anthony J. Sbarra and Robert R. Strauss), *by A. W. Segal* 241
Subcellular Biochemistry, Vol. 13: Fluorescence Studies on Biological Membranes (edited by H. J. Hilderson), *by D. Chapman* 242
The Flavonoids, Advances in Research Since 1980 (edited by J. B. Harborne), *by H. Grisebach* 242

A poem
Moon Plasmid, *by I. Lindberg* 222

JULY

Special issue on Structure and Function of Proteins

page
A flavor of protein chemistry, *by Ralph A. Bradshaw* 243
Similar amino acid sequences revisited, *by Russell F. Doolittle* 244
Highlights of protein structural analysis, *by John E. Shively, Raymond J. Paxton and Terry D. Lee* 246
Micro-level protein and peptide separations, *by Kenneth J. Wilson* 252
What can two-dimensional NMR tell us about proteins?, *by Peter E. Wright* 255
Protein crystallography: more surprises ahead, *by David Eisenberg and Christopher P. Hill* 260
Post-translational modifications of proteins: some problems left to solve, *by Sou Chi B. Yan, Brian W. Grinnell and Finn Wold* 264
Proteolytic processing and physiological regulation, *by Hans Neurath* 268
Glycoproteins: what are the sugar chains for?, *by James C. Paulson* 272
Protein translocation and turnover in eukaryotic cells, *by Ralph A. Bradshaw* 276
Secretion and membrane assembly, *by William Wickner* 280
The regulation of protein polymerization, *by Carl Frieden* 283
Structural basis of DNA–protein recognition, *by Richard G. Brennan and Brian W. Matthews* 286
How does protein folding get started?, *by Robert L. Baldwin* 291
Protein conformational prediction, *by Gerald D. Fasman* 295
Protein motifs and data-base searching, *by Janet M. Thornton and Stephen M. Gardner* 300
The *de novo* design of protein structures, *by Jane S. Richardson and David C. Richardson* 304
After sixty years: reflections on my life among the proteins, *by John T. Edsall* 310

AUGUST

Journal Club *page*
Channeling in the urea cycle: a metabolon spanning two compartments, *by Malcolm Watford* 313

Features
Misuse of nonlinear Scatchard plots, *by Kenneth Zierler* 314
Do the laws of chemistry apply to living cells? *by Peter J. Halling* 317
Talking point: Functional evolutionary divergence of proteolytic enzymes and their inhibitors, *by Thomas E. Creighton and Nigel J. Darby* 319

Letters
Alternative splicing or cloning artefact? *by Stephen E. Moss and Michael J. Crumpton* 325
Recursive irony? *by Peter R. Sibbald* 325
Persuasive citations, *by A. G. Dawson* 326
From bad to worse: evaluation by Journal Impact, *by Per O. Seglen* 326
The bias of citations, *by J. E. Dumont* 327
Citapeer or peercit? *by Günther Siebert* 328

Reviews
Challenging the three-dimensional structure of ribosomes, *by A. Yonath and H. G. Wittmann* 329
How do proteins recognize specific RNA sites? New clues from autogenously regulated ribosomal proteins, *by David E. Draper* 335
Molecular chaperones: proteins essential for the biogenesis of some macromolecular structures, *by R. John Ellis and Sean M. Hemmingsen* 339
PQQ, the elusive coenzyme, *by Paul M. Gallop, Mercedes A. Paz, Rudolf Flückiger and Herbert M. Kagan* 343
Protein targeting to the yeast vacuole, *by Joel H. Rothman, Carl T. Yamashiro, Patricia M. Kane and Tom H. Stevens* 347

Book Reviews
Genetic Recombination (edited by Raju Kucherlapati and Gerald R. Smith), *by Stephen C. West* 351
Cellular Oncogene Activation (edited by George Klein), *by Robert A. Weinberg* 351

Books in Brief
Post-translational Modification of Proteins by Lipids (edited by U. Brodbeck and C. Bordier) 352

Books Received 352

Lipsky Acrostic 353

SEPTEMBER

page

Features
Open Question: GTP-Binding proteins as possible targets for protein kinase C action, *by Ronit Sagi-Eisenberg* 355
Textbook Error: Regulation of vertebrate striated muscle contraction, *by Michael R. Payne and Suzanne E. Rudnick* 357

Letters
Interactions of glycolytic enzymes, *by Colin Masters* 361
(Reply from Rapoport) 361
Knowledge about ATPases ignored, *by Ramon Serrano* 361
(*Reply from Silver* et al.) 362
Purification of the D_2-dopamine receptor, *by Philip Strange* 362
Glutamine and protein turnover, *by K. L. Manchester* 362

Grapevine 363

Reviews
Evolution of eye lens crystallins: the stress connection, *by Wilfried W. de Jong, Wiljan Hendriks, John W. M. Mulders and Hans Bloemendal* 365
Quantum mechanical effects in enzyme-catalysed hydrogen transfer reactions, *by Judith Pollock Klinman* 368
Poly(A), poly(A) binding protein and the regulation of mRNA stability, *by Philip Bernstein and Jeffrey Ross* 373
Coordinated regulation of morphological and biochemical differentiation in a steroidogenic cell: the granulosa cell model, *by Abraham Amsterdam, Siegfried Rotmensch and Avri Ben-Ze'ev* 377
MHC class II invariant chains in antigen processing and presentation, *by Norbert Koch, Joachim Lipp, Ulrich Pessara, Klaus Schenck, Christopher Wraight and Bernhard Dobberstein* 383

Reflections on Biochemistry
On the tracks of our scientific forbears, *by Fritz Schlenk* 386

Microfile
Subcellular Fractionation and Centrifugation: A Strategic Approach (by K. R. Smith), *by Paul Luzio and Barbara Mullock* 390

Book Reviews
Principles of Exercise Biochemistry (edited by J. R. Poortmans), *by Nick Carter* 391
The Bacteriophages, Vols 1 and 2 (edited by R. Calendar), *by Noreen E. Murray* 391

Books in Brief
HPLC of Macromolecules: A Practical Approach (edited by R. W. A. Oliver) 392
Collodial Gold: A New Perspective for Cytochemical Marking (by Julian E. Beesley) 392
Biotransformations, Vol. 1 (by D. R. Hawkins) 392

OCTOBER

page

Journal Club
On the translational control of suicide in red cell development, *by Tim Hunt* 393
Small GTP-binding proteins, *by Robert D. Burgoyne* 394

Feature
Talking Point: The return of pancreatic ribonucleases, *by Steven A. Benner and Rudolf K. Allemann* 396

Letters
Zinc-finger motifs and DNA binding, *by G. Parraga, L. Young and R. E. Klevit* 398
(Reply from Struhl) 398
The collisional hypothesis of insulin action, receptor internalization and diabetes, *by Ivan Contreras and José Caro* 399
Cryptic clues and 'proteograms', *by Alan Shiels* 399

Reviews
Site-specific mutagenesis with unnatural amino acids, *by Spencer J. Anthony-Cahill, Michael C. Griffith, Christopher J. Noren, Daniel J. Suich and Peter G. Schultz* 400
A function for the *lck* proto-oncogene, *by Joseph B. Bolen and Andre Veillette* 404
Avidin–biotin technology ten years on: has it lived up to its expectations?, *by Meir Wilchek and Edward A. Bayer* 408
Dystrophin, the protein product of the Duchenne/Becker muscular dystrophy gene, *by Anthony P. Monaco* 412

Reflections on Biochemistry
The discovery of β-galactosidase, *by R. J. Rouwenhorst, J. T. Pronk and J. P. van Dijken* 416

Book Review Supplement
Molecular Biology of the Cell, 2nd Edn (edited by B. Alberts, D. Bray, J. Lewis, M. Raff, K. Roberts and J.D. Watson); and Molecular Biology of the Cell – The Problems Book (by J. Wilson and T. Hunt), *by J. B. Gurdon* 419
Is Science Necessary? (by Max Perutz), *by Peter N. Campbell* 419
Science as a Process (by David L. Hull), *by Jan Witkowski* 420
Australian Science in the Making (edited by R. W. Home), *by John R. Sabine* 421
Mass Spectrometry (Clinical Biochemistry; Principles, Methods and Applications, Vol. 1) (edited by A. M. Lawson), *by J. Stuart Thompson* 422
Biomolecular Data, A Resource in Transition (edited by Rita R. Colewell), *by Michael J. Sternberg* 423
The Cell Biology of Fertilization; and The Molecular Biology of Fertilization (edited by Heide Schatten and Gerald Schatten), *by Victor D. Vacquier* 424
Metastasis: Ciba Foundation Symposium 141 (edited by Gregory Bock and Julie Whelan), *by Kenneth Olden* 425
Mechanisms of Segmentation; Development, Vol. 104, Supplement (edited by V. French, P. Ingham, J. Cooke and J. Smith), *by Rex L. Chisholm* 426
Immunoglobulin Genes (edited by F. W. Alt, T. Honjo and T. H. Rabbitts), *by S. Pettersson and G. Cook* 426
Design of Enzyme Inhibitors as Drugs (edited by Merton Sandler and H. John Smith), *by John M. Whiteley* 427
Mobile DNA (edited by Douglas E. Berg and Martha M. Howe), *by J. F. Y. Brookfield* 428

Books in Brief
Antibodies: A Laboratory Manual (edited by Ed Harlow and David Lane) 429
Molecular Design of Life (by Lubert Stryer) 429
Chambers Concise Dictionary of Scientists (edited by David Millar, Ian Millar, John Millar and Margaret Millar) 429
Experimental Biochemistry (by Robert L. Dryer and Gene F. Lata) 430
Microstructure and Function of Cells (edited by Andreas Bubel) 430

NOVEMBER

Journal Club *page*
The regulatory role of thioredoxin in chloroplasts, *by David B. Knaff* 433

Features
Emerging Techniques: Confocal scanning microscopy: three-dimensional biological imaging, *by David Shotton and Nicholas White* 435
A pitfall in the computer-aided quantitation of autoradiograms, *by Stéphane Swillens, Pascale Cochaux and Raymond Lecocq* 440

Letters
Esterification and transesterification: effect of the reaction on enzyme activity, *by Michel Goldberg* 442
(Reply from Harwood) 442
Potential misinterpretation of the competitive binding assays, *by Elena Presecan, Horea Porumb and Ioan Lascu* 443
The repeat of the same, *by B. Müller-Hill* 444
(Reply from Halling) 444

Reviews
Self-cleavage of RNA in the replication of small pathogens of plants and animals, *by Robert H. Symons* 445
Barnase and barstar: two small proteins to fold and fit together, *by Robert W. Hartley* 450
Extracellular signals, transcriptional responses and cellular specificity, *by Harvey R. Herschman* 455
Invasive adenylate cyclase toxin of *Bordetella pertussis, by Emanuel Hanski* 459

Reflections on biochemistry
Microscopy and comprehension: the development of understanding of the nature of the cell, *by Brian Bracegirdle* 464

Grapevine 468

Video View
Transgenic Techniques in Mice: A Video Guide (by R. A. Pedersen and J. Rossant), *by Martin Johnson* 469
Immunology in Focus (edited by A. Johnstone, J. Kay, L. Steiner and S. King), *by Dennis Burton* 469

Book Reviews
Peptide Hormones as Prohormones: Processing, Biological Activity, Pharmacology (edited by Jean Martinez), *by John M. Stewart* 470
Biophysical Chemistry of Dioxygen Reactions in Respiration and Photosynthesis (edited by Tore Vänngård), *by P. R. Rich* 470

DECEMBER

Journal Club *page*

Evolving to dissimilate hydrocarbons, *by Norma Allewell* 474

Features

The Complex Carbohydrate Structure Database, *by Scott Doubet, Klaus Bock, Dana Smith, Alan Darvill and Peter Albersheim* 475

Textbook Error: The gluconeogenicity of fatty acids in mammals, *by Jean-Pierre Draye and Joseph Vamecq* 478

Letters

Evolution of ATPases, *by Todd Silverstein* 480

(Reply from Nelson) 480

Channeling of glycolytic intermediates by temporary, stationary bi-enzyme complexes is probable *in vivo*, *by József Batke* 481

Reviews

How are substrates recognized by the ubiquitin-mediated proteolytic system? *by Aaron Ciechanover and Alan L. Schwartz* 483

Nitric oxide: biosynthesis and biological significance, *by Michael A. Marletta* 488

Haem as a multifunctional regulator, *by G. Padmanaban, V. Venkateswar and P.N. Rangarajan* 492

Protein tyrosine dephosphorylation and signal transduction, *by Nicholas K. Tonks and Harry Charbonneau* 497

Tissue-specific genes for respiratory proteins, *by Margaret I. Lomax and Lawrence I. Grossman* 501

Lipsky Acrostic 504

Reflections on Biochemistry

Creation of a general model of RNA spatial organization, *by Alexey A. Bogdanov* 505

Grapevine 508

Books Received 508

Book Reviews

Glutathione Conjugation: Mechanisms and Biological Significance (edited by H. Sies and B. Ketterer), *by Bengt Mannervik* 509

Neuropeptides: A Methodology (edited by G. Fink and A. J. Harmar), *by Randolph V. Lewis* 509

Biochemistry of Antimicrobial Action, 4th Edn (by T. J. Franklin and G. A. Snow), *by Alan Wiseman* 510

Fibronectin (edited by Deane F. Mosher), *by Francisco E. Baralle* 511
